Internet Technologies and Website Design

Course Work

Think about any product or service you can sell to the public. The task is to use all the tools and techniques you have learnt, to create website for your company or organization.

The website should have at least four pages including the home page, services page, about us page, news page and the contact us page.

The home page should contain

- Start the page with a tagline that summarizes what the site or company does
- Your service or product images plus a description
- Links to all other pages
- Any other relevant information

The services page should contain

- A detailed description of services or products your company offers.
- Latest news and developments
- Links to all other pages
- Any other relevant information

The about us page should contain

- A detailed description of the company or organization
- The management team
- Company profile, values, mission and vision
- Any other relevant information
- Links to all other pages
- A short video (1 minutes) showing team members.

The contact us page should contain

- Telephone and email contacts
- A form that can be used by a customer to send a comment or enquiry to your company

The News page should contain

- Latest news
- Links to company social media pages such as Facebook

You can also include any other relevant pages to your site (bonus marks)

Form should be like one shown in the figure

Instructions

You are required to do this assignment in groups of two.

Each member of the group should participate fully and be ready to present in class

Marks shall be awarded on individual basis

Marking scheme

- Beauty and look of the site
- Use of CSS
- Choice of good color
- Presentation skills
- Creativity

The assignment should be ready by the date indicated on the submission box for presentation and marks will be awarded to only those who will present in class.

Create a github account (https://github.com/) and upload your files. Share the project link with your friends.
